

Web Programming Assignment

Students:

Kaan Akgün- 20190808017

<https://github.com/jokerghost484>

Hakan Zavrak- 20190808062

<https://github.com/Laufeyzn>

Defne Bulut- 20200808604

<https://github.com/defnebulut>

Requirements

Customer Part:

Users can sign up with their name, surname, email and password.

Users can log in with the web application.

The website can verify a user's account and password if it is correct they can enter the system.

If the registration fails an error will pop up.

Users can search for reservations by choosing pick-up location, dates for use period, car type, extra service and for how many people.

Users can see the car information while searching for reservations or they can just see all the car information by going to the vehicles page.

When the user wants to make a reservation while not logged in registration box will pop up.

When users decided to make a reservation they can choose a saved address or they can add a new address.

Users need to enter their card information for purchase and they can save it for future purchases.

When the reservation is completed without any problem a reservation number and details will pop up.

If a reservation cannot complete an error message will pop up and returns to the purchase page.

Users can change or cancel their advanced reservation until 24 hours are left.

Users can see their account details like their all reservations and also add their address and card number if they want to.

Employee Part:

All employees can log in with their companies email and password.

The website can verify an employee's email and password if it is correct they can enter the system.

If registration fails an error will pop up.

Employees can make announcements or see the announcements published by other employees.

Employees can see all the cars and their information.

Employees can see all reservations with details and they can search them by main features like car ID.

Employees can deactivate/activate a car and its reservations by using car ID.

Employees can add cars by selecting features.

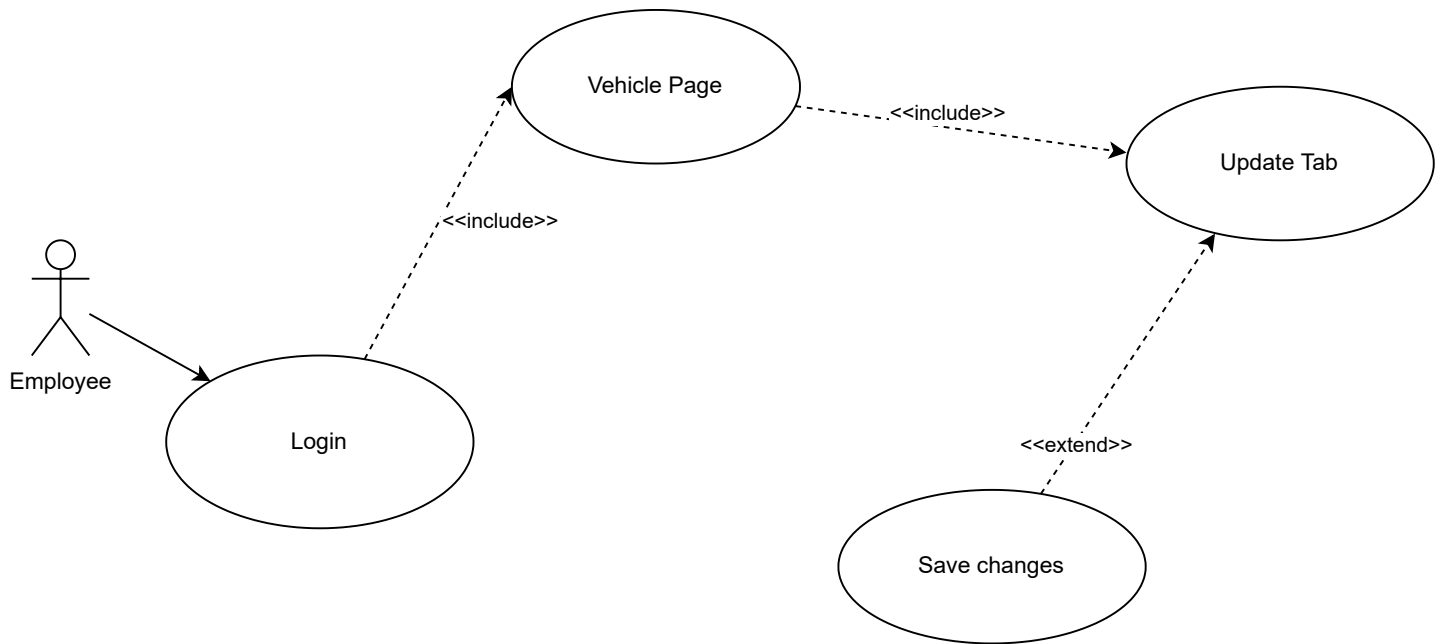

Employees can update cars information.

Employees can see financial analysis of their company.

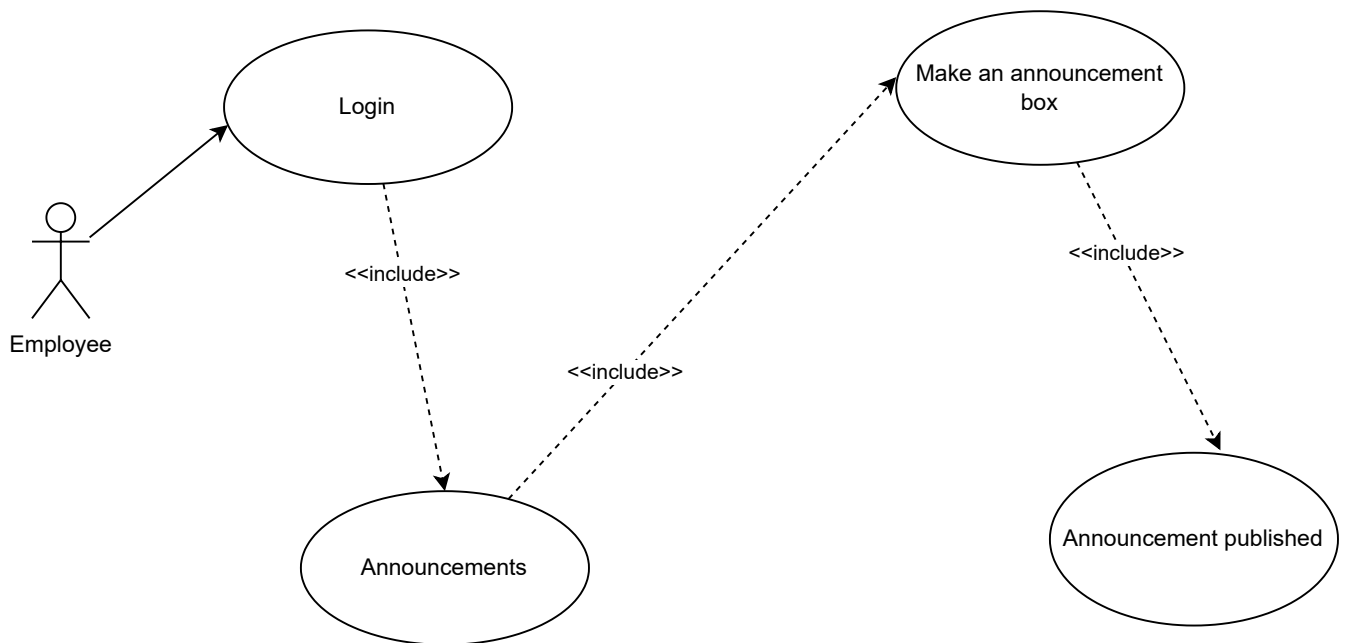

Employees can see other departments' phone numbers and email addresses.

Employees can see and update their information.

The image is a hand-drawn wireframe of a web application for a company named "DrCars". The design is presented in a sketchy, hand-drawn style with various elements outlined in black.

At the top, there is a browser-like header with a search bar and navigation links: "Home", "Vehicles", "Company", "Reservation", and "Contact Us". A "Company logo" placeholder is on the left, and "Sign Up" and "Login" links are on the right.

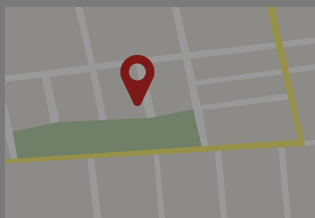

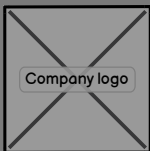

The main content area features a large modal window for user authentication. This modal has two tabs: "LOG IN" (active) and "SIGN UP". It contains a "Company logo" placeholder, an "Email Address" input field, a "Password" input field with an eye icon for toggling visibility, a "Remember me?" checkbox, a "Forgot Password?" link, a "LOG IN" button, and a "Don't have an account? Sign up" link.

Below the modal, there is a section titled "MEET THE FLEET" which includes a video player. The video player has a large "more info >" button in the center and a progress bar at the bottom.

The footer contains a list of navigation links: "Home", "Cars", "Company", "Solutions", "Reservation", and "Contact Us". It also features a "Company logo" placeholder, a map showing a location with a red pin, and contact information: "lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt +12 345 67 89" and "loremipsum@hotmail.com". Social media icons for Facebook, Twitter, and Instagram are also present.

The entire design is set against a light gray background with various placeholder text like "lorem ipsum" and "Company logo" to indicate where content should be placed.
